

SP QUICKSHIFTER CGS4 Plug&Play installation for HUSQVARNA FS450 MY '16-'19

GND CONNECTION:
Connect the GND eye termination to the chassis.

INJECTOR CONNECTION:
Identify the injector connector on the throttle body. Disconnect the injector plug connector and connect the male/female connector of the quickshifter harness.

TPS CONNECTION:
Tin and insulate the Green TPS wire to the Yellow/Orange wire in the throttle position sensor.

WARNING ! Incorrect installation of the electrical part can detrimentally affect the proper operation and/or integrity of the Quick Shifter Kit and/or of the vehicle's electrical system. SP electronics declines all responsibility as regards the points listed above and any consequences of them, in relation to any damage caused to any part of the vehicle, to the rider or to transported third parties arising out of the installation and/or use of devices described in this manual.
